

marie rush-lash

## Extension Sizing Chart

• Since all the extensions are hand-made, some extensions may have differences in curl, angle or length.

Curl tolerance: Considered good products if within the tolerance interval.

• The marie rush-lash extensions series' length differs from the real ruler length.

ex) 0.15 mm / 9 mm ⇒ Ruler size 0.15 mm / 10.5 mm

• The extensions' tips are tapered and get thinner as they become shorter. The short extensions such as 4mm and 5mm, etc. will have thinner thickness as is indicated (note: what is written as thickness).

• L+ curls may have more irregularity in curls and lengths as it is hard to control during the production.
